Muhammad Takmeel

FULL STACK & FLUTTER DEVELOPER

PROFILE

Full Stack Web and Flutter Developer building responsive web applications, Android apps and practical developer tools. Experienced with React, Next.js, Node.js, MongoDB, Flutter and Firebase, with projects in AI-powered tooling, cybersecurity and digital wellbeing.

EXPERIENCE

Freelance Web & Mobile Developer

2023 - Present

- Developed responsive websites and full-stack applications with React and Node.js.
- Built Flutter Android interfaces and integrated authentication and cloud services.
- Delivered software projects focused on usability, automation and security.

SELECTED PROJECTS

SafeNest — Child Monitoring & Digital Wellbeing

Flutter parent-child monitoring app with device linking, multi-child management, app usage insights, per-app limits, restricted-app overlays, study and bedtime modes, time requests, rewards and parent-child chat.

AI README Generator — Published VS Code Extension

AI-assisted VS Code extension generating structured README documentation for software projects, helping developers document repositories efficiently.

Phishing URL Detector

Security tool that analyzes URLs for suspicious or phishing indicators and presents risk warnings to users.

Digital Signature System

Digital document-signing system for applying and managing electronic signatures and supporting paperless workflows.

University Lost & Found Management System

Web application for posting lost and found items, browsing listings and managing reports to help return belongings to owners.

Online Examination System

Web-based platform for organizing online tests, managing questions and enabling students to complete assessments digitally.

EDUCATION

Bachelor of Software Engineering

2023 - 2027

Thal University Bhakkar
